- RESEARCH: methods, approaches and (collaborative) practices
- OTHERS

Open calls are dedicated to researchers who wish to present their research at the AILA 2023 Congress but who cannot find a symposium related to their research theme. Proposals submitted in the open calls will be reviewed with regard to 1) the relevance to the targeted theme, 2) the originality of the subject and/or the methodology, 3) the selection of a subject

that is not often treated in research, and 4) the quality of the research. It is essential that submissions meet these four criteria.

In the open call "sustainable development", we expect all research that reflects on the way our societies think about sustainable development. It could be descriptive or critical or even committed work that questions the way in which these issues are dealt with in different fields (politics, economics, education, etc.). All fields of research in Applied Linguistics are concerned by this open call.
