- RESEARCH: methods, approaches and (collaborative) practices
- OTHERS

Open calls are dedicated to researchers who wish to present their research at the AILA 2023 Congress but who cannot find a symposium related to their research theme. Proposals submitted in the open calls will be reviewed with regard to 1) the relevance to the targeted theme, 2) the originality of the subject and/or the methodology, 3) the selection of a subject

that is not often treated in research, and 4) the quality of the research. It is essential that submissions meet these four criteria.

In the open call "minority languages", are expected all the works focusing on languages little treated or less described. They can also focus on languages that are produced by individuals whose status leads them to be minority in their spaces. All areas of applied linguistics will be concerned by this call.
